

# Yash Padhye

Houston, Texas

📞 832-358-6560 ✉️ [yashpadhye2016@gmail.com](mailto:yashpadhye2016@gmail.com) 🔗 [linkedin.com/in/yash-padhye/](https://www.linkedin.com/in/yash-padhye/) 🐙 [github.com/yashpadhye17](https://github.com/yashpadhye17)

## EDUCATION

### University of Houston

Houston, Texas

Master of Science in Engineering Data Science and Artificial Intelligence (GPA: 3.83/4.0)

Aug. 2025 – May 2027

**Relevant Coursework:** Machine Learning, Applied Neural Networks, Artificial Intelligence, Probability and Statistics, Data Science, Big Data Analytics, Cloud Computing, Digital Image Processing, Data Analytics for Engineering Managers

## EXPERIENCE

### AI Workflow Implementation Intern

June 2026 – Present

GLX Technologies

Houston, Texas

- Integrated AI and data-processing services into existing business systems using Python, n8n, Claude AI, and Microsoft Azure, supporting reliable automation across multiple production workflows.
- Created an automated sales opportunity pipeline that uses AI agents to identify relevant leads and delivers curated opportunities to the sales team on a weekly schedule.
- Reduced financial report preparation from 2 days to 15 minutes by connecting n8n workflows with Oracle NetSuite ERP for automated data retrieval, transformation, and report generation.

### Application Developer

Dec 2025 – June 2026

University of Houston

Houston, Texas

- Reduced course evaluation report generation time by 70% through SQL stored procedure execution, reusable data-processing workflows, and standardized reporting logic.
- Shortened university notification delivery from 2 days to under 5 minutes by implementing a Python and SQL scheduling system for recurring stakeholder communications.
- Standardized recurring datasets and reporting workflows with VBA-based data transformation tools, reducing repetitive manual processing for university stakeholders.

### Associate Data Scientist

July 2024 – July 2025

Inorg Global India Private Limited

Pune, India

- Achieved 93% face-detection accuracy across 100,000+ audience records by applying Python, DeepFace, MTCNN, image processing, and computer vision techniques.
- Reduced valuation analysis turnaround from 8 days to 10 minutes through Python ETL, feature engineering, data transformation, and analytical workflows in Dataiku.
- Handled 5,000+ customer queries at a 3–5 second average response time by implementing and evaluating a ReAct-based NLP agent with LangChain, real-time APIs, and databases.

## TECHNICAL SKILLS

**Programming:** Python, C++, C, C#, SQL, R, Bash, Git, Linux/Unix

**Software Engineering:** Object-Oriented Programming, Data Structures, Algorithms, REST APIs, Modular Development, Version Control, CI/CD, Agile/Scrum, Test-Driven Development

**Data & Databases:** SQL, MySQL, PostgreSQL, MongoDB, Snowflake, Pandas, NumPy, PySpark, ETL Pipelines, Data Transformation, Data Analysis

**Cloud & Infrastructure:** Microsoft Azure, AWS, Google Cloud Platform, Docker, Kubernetes, Jenkins, CircleCI, MLflow, Azure Data Factory

**AI & Machine Learning:** Scikit-Learn, TensorFlow, PyTorch, Feature Engineering, Model Training, Cross-Validation, Model Evaluation, NLP, Computer Vision, OpenCV, YOLO, DeepFace, LangChain, HuggingFace Transformers, RAG

**Development Tools:** FastAPI, Flask, Dataiku, VBA, Power BI, Tableau, Apache Airflow

## ACADEMIC PROJECTS

### Technical Reports Research Assistant | Python, LangChain, ChromaDB, FastAPI, RAG

Aug. 2026

- Processed 646K+ NASA technical records to support semantic search and question answering across technical reports and associated documents.
- Established a reproducible document-processing pipeline covering PDF extraction, chunking, metadata enrichment, embedding generation, and vector indexing with Python and LangChain.
- Measured retrieval quality using Recall@K and answer relevance on a technical-query benchmark and incorporated citation-grounded generation to improve response reliability.

### Legal AI Hub | Python, LangChain, ChromaDB, Groq, Streamlit, AI Agents

May 2026

- Implemented six AI-agent pipelines for contract analysis, compliance auditing, and regulatory research using dense vector retrieval, BM25, and structured document processing.
- Applied Pydantic-based output validation to enforce consistent machine-readable results for downstream applications and analysis.

## CERTIFICATIONS

**Microsoft Certified: Fabric Data Engineer Associate** – March 2026

**Microsoft Certified: Azure AI Fundamentals** – May 2025

**Microsoft Certified: Azure Data Fundamentals** – April 2025
